

Edvin Tahirović

SOFTWARE DEVELOPER

Podgorica, Montenegro

+382 69 050 190 | edwwinthr@gmail.com | github.com/edwwinthr-del

Profile

I'm a PHP/Laravel developer based in Podgorica, with a degree in Management Information Systems. My experience so far includes supporting ERP users and developing business software through a graduate training programme. I'm interested in building applications that make everyday work easier, and I also explore AI through personal projects. I'm looking for an opportunity to contribute to a team, learn from experienced colleagues and keep growing as a developer.

Experience

Data Design d.o.o.

Podgorica, Montenegro

PHP Developer - Graduate Professional Training Programme

Jan 2026 - Oct 2026

- Developed features for Tiramisu ERP using PHP, PostgreSQL and JavaScript, based on business analysts' requirements, with senior code review, Jira and Git.
- Worked on a VAT and tax reporting module and the SEF project integrating the ERP with Serbia's national e-invoicing system.
- Improved an ERP-connected webshop's performance and accessibility through asset loading changes, WebP images and ARIA attributes.
- Started in user support, handling ERP requests, explaining features and resolving issues encountered in daily work.
- Debugged PHP with Xdebug and troubleshooted Apache on Ubuntu; wrote SQL joins and aggregations and applied validation, XSS and CSRF protections.

Global Mine d.o.o.

Nikšić, Montenegro

Administrative Officer, Finance

Aug 2024 - Dec 2025

- Maintained payment, invoice and receivables records in Excel and Word, handled confidential financial data and provided Turkish translation.

Projects

adminisMine - Finance & Operations System

GitHub

Laravel 13, PHP 8.5, Next.js 16, TypeScript, PostgreSQL, Redis, OpenAI API

- Developed modules for payables, receivables, payroll and multi-currency records, with permissions, audit logs, validated imports and 19 Excel/PDF reports.
- Built an AI assistant in Serbian, Turkish and English for searching, summarising and drafting records. Proposed changes use structured JSON, validation and user confirmation before saving.

MnEcommerce - E-commerce Application

GitHub

Laravel 13, Next.js 16, TypeScript, PostgreSQL 18, Filament, Docker, GitHub Actions

- Built a storefront, REST API and admin panel for catalog, orders and inventory; used PostgreSQL locking and idempotent checkout retries to handle concurrent and repeated orders.
- Added 65 automated tests across backend, concurrency, frontend and browser flows, CI quality checks and Docker Compose configuration. MVP tested locally.

Crypto Market AI Report - n8n Workflow

GitHub

n8n, Anthropic Claude, REST APIs, JavaScript, Telegram Bot API

- Combined data from two market APIs, processed around 2,000 records in JavaScript and used an AI agent to generate a daily report for Telegram.

Other Projects

- EbookEcommerce:** Laravel/React e-book store with Stripe Checkout and verified webhook signatures.
- BatoDetailing:** Laravel/Alpine.js booking system with three access levels, queued emails and PDF invoices.
- RadarME:** Flutter/Firebase app for Android and iOS with GPS alerts for 88 radar locations in Montenegro.

Education

Bartın University

Bartın, Türkiye

B.Sc. in Management Information Systems

2024

Coursework: WordPress, JavaScript, C#, Delphi and cybersecurity fundamentals.

Skills

Backend: PHP 8, Laravel (Eloquent, queues, events, Sanctum), REST APIs, OOP, PostgreSQL, SQL, Redis

AI: AI coding agents, prompt engineering, OpenAI/Anthropic APIs, structured outputs, n8n

Frontend & Mobile: JavaScript, TypeScript, React, Next.js, Tailwind CSS, WordPress, Flutter/Dart

Quality & DevOps: PHPUnit, Playwright, Larastan, GitHub Actions, Docker, Linux, Nginx, Apache, Git

Languages: Montenegrin (native), English (advanced, SAT), Turkish (advanced)
